

Installer - Modular Structures**Role:**

We are seeking a construction installer to assist our experienced installation team on-site. The successful candidate must be organised, efficient and determined to finish work well. This role requires travel across the UK and staying away Monday - Friday and occasional weekends. The successful candidate will be trained in CSCS and IPAF.

The core activity is constructing the company's modular structures on sites in the UK. The structures are curved steel frames that slot and bolt together - the fabric cladding is stretched and fastened over the structure. We are continually improving our product range, so a desire to produce high-quality work is required, and providing feedback from our construction teams forms a key part of this process.

Business:

McGregor Group is a design and manufacturing business based in Hampshire, UK. Working across industrial, defence and agricultural markets, the company produces innovative tensile fabric structures. An established business with youthful ambition, McGregor Group aims to innovate products and develop its brand across markets - expanding sales across the UK, Europe, and the rest of the world.

Required:

- High-quality approach to the construction of modular structures
- Communicating with clients on-site
- Problem-solving skills
- Strong work ethic
- Attention to detail

Provided:

Training is provided to ensure you are confident and skilled in building the structures on-site, with additional on and off-site engineering support where necessary.

- Van and tools
- Fuel
- Accommodation*
- Sustenance per day

Job type: Full-time, Permanent
